# ABOUT US

**SAFECOAT FIRE SOLUTIONS is a leading provider of advanced passive fire protection systems, offering innovative solutions like fire-retardant coatings and fire safety sealing systems. Our flagship products, including SC-01, SC-02 and SC-03, are rigorously tested for flammability, smoke density, and durability. Backed by our partnership with Saviour Fire Retardant Systems, we ensure top-tier quality and compliance. Trusted by major infrastructure, energy, and construction firms across India, we are dedicated to protecting lives and property. At SAFECOAT, we don't just make products — we engineer fire safety for today's needs and tomorrow's standards.**

## OUR MISSION

At SAFECOAT, our mission is to make fire safety simple, reliable, and part of everyday life. We're here to help protect people and places with easy-to-use, effective solutions—so families, workers, and communities can feel secure, without worrying about what might go wrong.

## OUR VISION

At SAFECOAT, we envision a future where fire protection is a must — where every home, office, and factory is built with safety in mind. We aim to shift the perception of fire safety from a last resort to a way of life.

A firefighter is shown from the back, wearing a white helmet and a dark jacket with "SAFECOAT" written on the back in large, bold, white letters. The firefighter is looking towards a large fire at night, with smoke and flames visible in the background. The scene is dimly lit, with the fire providing the primary light source.

## OUR SERVICES

### Passive Fire Sealing Solutions

Installation and consultation on SC-01, SC-02 (Single Component) and SC-03 (Multi Compound) fire sealing systems for cable trays, pipe penetrations, ducts, and expansion joints.

### Custom Fireproofing Solutions

Tailor-made solutions for unique construction and infrastructure needs—including OEM branding, custom packaging, and product adaptation.

### On-Site Technical Support

Expert guidance for application, product selection, and execution of fireproofing projects to ensure safety, performance, and code compliance.

### Product Training & Demonstrations

Training sessions for engineers, applicators, and safety officers to ensure proper use and maximum effectiveness of our systems.

# OUR PRODUCTS

## SC-01: Fire-Retardant Coating.

### Description:

SC-01 is a high-performance intumescent fire-retardant coating engineered to slow down flame spread and reduce heat transmission during a fire. Upon exposure to heat, it expands to form an insulating char barrier, protecting structural elements and extending evacuation time.

### Applications:

- Electrical wires
- Structural steel beams
- Cable trays and ducts
- Wooden surfaces, walls, and ceilings

### Key Features:

- Water-based and non-toxic
- Quick-drying with high adhesion
- Complies with major fire safety standards
- Tested for 3 hours

# SC-02: Passive Fire Sealing System

## Description:

SC-02 is a single-component, intumescent-based sealing system used to reinstate fire resistance in walls and floors where cable services penetrate. It expands rapidly under fire conditions, blocking fire, smoke, and gases from passing through.

## Applications:

- Pipe penetrations (metal, plastic, insulated)
- Cable bundles and trays
- HVAC & utility penetrations

## Key Features:

- Easy application via gun or hand tool
- Flexible and paintable once cured
- Tested as per Indian standards

# SC-03: Multi-Compound Fire Sealing System

## Description:

SC-03 is a robust and flexible compound-based sealing solution designed for dynamic penetrations and larger openings. It uses a multi-layered approach combining intumescent, elastomeric, and fire-resistant materials to deliver durable protection in high-risk environments.

## Applications:

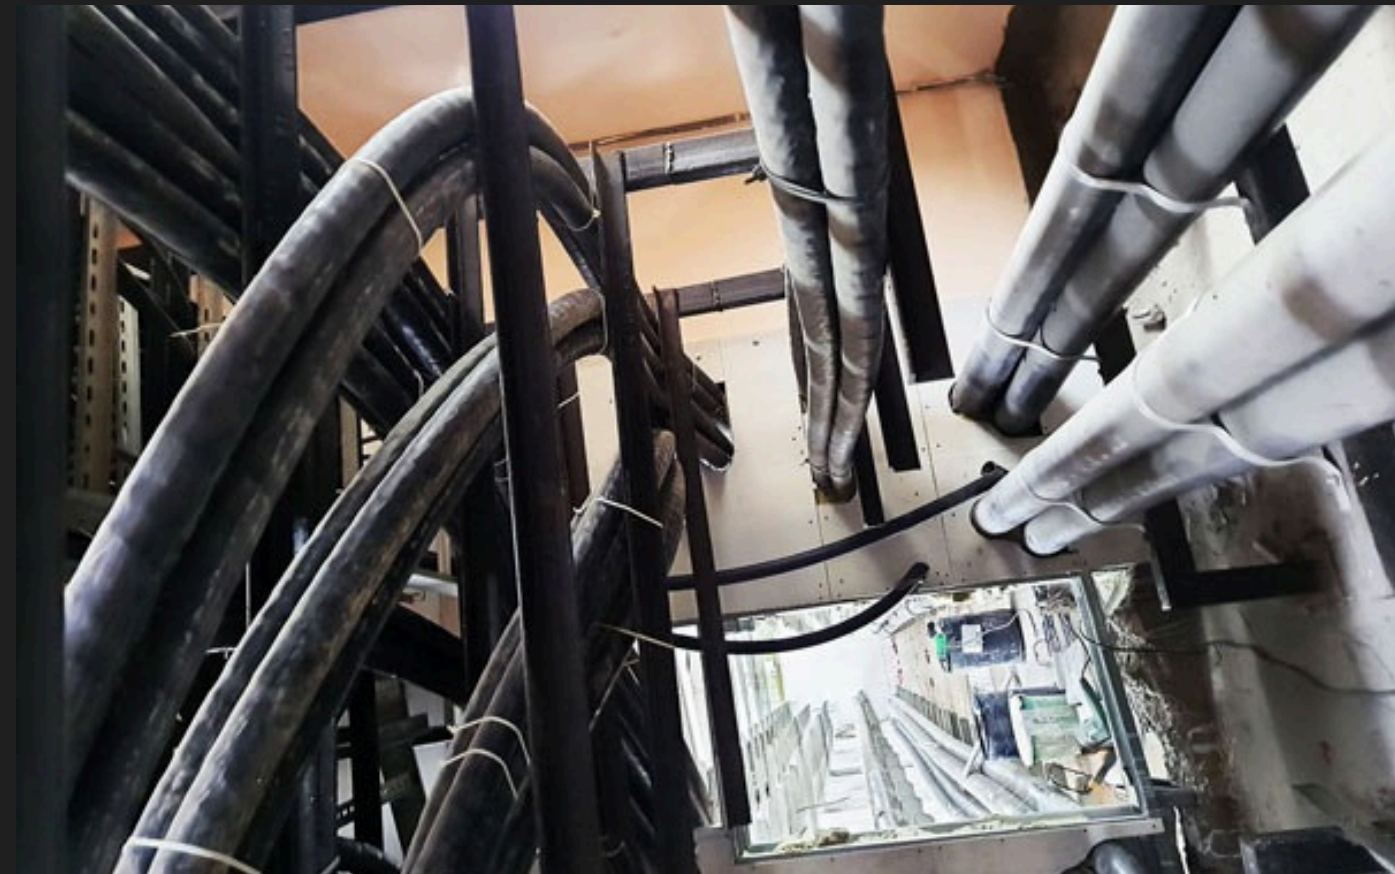

- Mixed service bundles (like electrical cables, data-cables, waterpipes, gaslines or HVAC ducts)
- Expansion joints and large conduits
- High-vibration or retrofitted areas

## Key Features:

- Multi-layered protection with superior durability
- Withstands mechanical movement and thermal stress
- Suitable for industrial, commercial, and infrastructure projects
